1. Nature of Operations and Going Concern

Manitou Gold Inc. (the "Company") was incorporated under the Business Corporations Act (Ontario) and is engaged in the business of locating and exploring mineral properties. Substantially all of the efforts of the Company are devoted to these business activities. To date, the Company has not earned significant revenues and is considered to be in the exploration stage. The Company's registered office is located at 101-117 Elm Street, Sudbury, Ontario, P3C 1T3.

These unaudited condensed consolidated interim financial statements have been prepared using accounting policies applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they become due.

The Company is at an exploration stage and as is common with many exploration companies, it raises financing for its exploration and acquisition activities. The Company has incurred losses in previous periods, with a current net loss of \$431,399 for the nine months ended September 30, 2015 (nine months ended September 30, 2014 - \$542,627) and has an accumulated deficit of \$18,154,118 as at September 30, 2015 (December 31, 2014 - \$17,722,719). In addition, the Company had working capital of \$301,787 at September 30, 2015 (December 31, 2014 - \$601,758).

However, the existing funds may not be sufficient to explore potential exploration project acquisitions and in due course, further funding will be required. In the event that the Company is unable to secure further financing it may not be able to complete the development of its projects.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts and political uncertainty.

Due to continuing operating losses and limited working capital, the Company's ability to continue as a going concern is dependent on its ability to obtain additional sources of financing to successfully explore, evaluate and develop mineral projects and ultimately, to achieve profitable operations. The success of these endeavors cannot be predicted at this time. These conditions indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. The unaudited condensed consolidated interim financial statements do not reflect adjustments to the carrying values and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern, and such adjustments may be material.

2. Significant Accounting Policies

Statement of Compliance

The Company applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the IFRS Interpretations Committee. These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34 - Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements.

The policies applied in these unaudited condensed consolidated interim financial statements are based on IFRS issued and outstanding as of November 9, 2015, the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these unaudited condensed consolidated interim financial statements as compared with the most recent annual consolidated financial statements as at and for the year ended December 31, 2014, except as noted below. Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ending December 31, 2015 could result in restatement of these unaudited condensed consolidated interim financial statements. These adjustments could be material.

Recent Accounting Pronouncements

IFRS 9 - Financial Instruments ("IFRS 9") was issued in final form in July 2014 by the IASB and will replace IAS 39 - Financial Instruments: Recognition and Measurement ("IAS 39"). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 also includes requirements relating to a new hedge accounting model, which represents a substantial overhaul of hedge accounting which will allow entities to better reflect their risk management activities in the financial statements. The most significant improvements apply to those that hedge non-financial risk, and so these improvements are expected to be of particular interest to non-financial institutions. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier application is permitted.

3. Change in Accounting Policy

During the year ended December 31, 2014, the Company retrospectively changed its accounting policy for exploration and evaluation expenditures. Previously, the Company capitalized acquisition costs and deferred exploration and evaluation expenditures of mineral properties to the specific mineral properties, net of recoveries received.

Under the new policy, exploration and evaluation expenditures incurred prior to the establishment of technical feasibility and commercial viability of extracting mineral resources and prior to a decision to proceed with mine development are charged to operations as incurred. As required by IAS 8 - Accounting Policies, Changes in Accounting Estimates and Errors, the Company included the restated consolidated statement of financial position as at January 1, 2014, restated unaudited condensed consolidated interim statement of loss and comprehensive loss for the three and nine months ended September 30, 2014 and restated unaudited condensed consolidated interim statement of cash flows for the nine months ended September 30, 2014. Management considers this accounting policy to provide more reliable and relevant information and more clearly represents the Company's activities.
