Manitou's net loss totaled \$81,048 for the three months ended March 31, 2016, with basic and diluted loss per share of \$0.00. This compares with a net loss of \$87,646 with basic and diluted loss per share of \$0.00 for the three months ended March 31, 2015. The decrease in net loss of \$6,598 was principally because:

- Professional fees decreased to \$2,684 for the three months ended March 31, 2016 (three months ended March 31, 2015 - \$23,175). The decrease was primarily due to lower support costs and cost reductions for the Company's operations.
- Exploration and evaluation expenditures marginally decreased to \$13,030 for the three months ended March 31, 2016 (three months ended March 31, 2015 - \$13,878). Costs related to geological modelling and care and maintenance costs.
- Interest income marginally increased to \$312 during the three months ended March 31, 2016, compared to \$nil during the three months ended March 31, 2015. The Company had guaranteed investment certificates ("GICs") amounting to \$150,922 earning interest at the prime rate less 2.0%.
- Share-based payments increased to \$4,500 during the three months ended March 31, 2016, compared to \$nil during the three months ended March 31, 2015. On February 12, 2016, the Company granted options to acquire a total of 250,000 common shares of the Company to a consultant of the Company at the exercise price of \$0.10 per share for a period of two years. Share-based payments will vary from period to period depending upon the number of options

granted and vested during a period and the fair value of the options calculated as at the grant date.

- All other expenses related to general working capital.

As at March 31, 2016, the Company had assets of \$180,450 and a net equity position of \$158,156. This compares with assets of \$268,797 and a net equity position of \$234,704 at December 31, 2015. The Company has \$22,294 of liabilities and no debt (December 31, 2015 – \$34,093 of liabilities and no debt). The Company expensed exploration and evaluation expenditures of \$13,030 during the three months ended March 31, 2016 (three months ended March 31, 2015 - \$13,878).

Other Projects

Other projects are on hold at the date of this Interim MD&A. Subject to the availability of cash, staff and time, exploration programs and budgets may be developed for Manitou's other projects.

Cash Flow

At March 31, 2016, the Company had cash and cash equivalents of \$154,782. The decrease in cash and cash equivalents of \$101,093 from the December 31, 2015 cash and cash equivalents balance of \$255,875 was as a result of cash outflow in operating activities of \$101,093. Operating activities were affected by adjustments of share-based payments of \$4,500 and net change in non-cash working capital balances of \$24,545 because of an increase in amounts receivable and other assets of \$12,746 and a decrease in amounts payable and other liabilities of \$11,799.

The Company believes that additional financing will be required to fund its operating expenses and maintain its mineral properties beyond December 31, 2017.

Liquidity and Capital Resources

The activities of the Company, principally the acquisition and exploration of properties prospective for precious metals, are financed through the completion of equity transactions such as equity offerings and the exercise of stock options and warrants. There is no assurance that future equity capital will be available to the Company in the amounts or at the times desired by the Company or on terms that are acceptable to it, if at all. See "Risk Factors" below.

The Company has no operating revenues and therefore must utilize its current cash reserves, funds obtained from the exercise of warrants and stock options and other financing transactions to maintain its capacity to meet ongoing operating activities. As of March 31, 2016, the Company had 55,022,411 common shares issued and outstanding and 4,250,000 options outstanding that would raise \$425,000 if exercised in full. This is not anticipated in the immediate future. See "Trends" above.

For the three months ended March 31, 2016

Discussion dated: May 5, 2016

Amounts payable and other liabilities decreased to \$22,294 at March 31, 2016, compared to \$34,093 at December 31, 2015, and consist of amounts that are to be extinguished in due course. The Company's cash and cash equivalents as of March 31, 2016 is sufficient to pay these liabilities.

At March 31, 2016, the Company had working capital of \$158,156, compared to \$234,704 at December 31, 2015, a decrease of \$76,548, or approximately 33%. The Company had cash and GICs of \$154,782 at March 31, 2016, compared to \$255,875 at December 31, 2015, a decrease of \$101,093, or approximately 40%. The decrease in working capital and cash and GICs can be attributed to costs related to maintaining the Company's minerals properties and operating expenses.

While the Company has no source of revenue, it believes it has sufficient cash resources to meet its administrative overhead and maintain its mineral investments on a care and maintenance basis, depending on future events, to December 31, 2017. The Company estimates its administrative overhead for fiscal 2016 and 2017 to be approximately \$220,000. In order to meet future expenditures and cover administrative and exploration costs beyond December 31, 2017, the Company will need to raise additional financing. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or under terms favourable to the Company. See "Risk Factors" below and "Caution Regarding Forward-Looking Statements" above.

Outlook

Although there can be no assurance that additional funding will be available to the Company, management is of the opinion that the gold price will be favourable, and hence it may be possible to obtain additional funding for its projects.

Notwithstanding, the Company is mindful that the gold price could fall with little or no warning. Accordingly, its plans for the near term are to maintain its properties on a care and maintenance basis, to monitor market fundamentals, and to ensure that the Company is well positioned to weather any possible resurgence of a market downturn. See "Risk Factors".

maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers filing such certificate are not making any representations relating to the establishment and maintenance of:

The Company's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in such certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Risk Factors

An investment in the securities of the Company is highly speculative and involves numerous and significant risks. Such investment should be undertaken only by investors whose financial resources are sufficient to enable them to assume these risks and who have no need for immediate liquidity in their investment. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Company and its financial position. Please refer to the section entitled "Risk Factors" in the Company's Annual MD&A for the fiscal year ended December 31, 2015, available on SEDAR at www.sedar.com.
