

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

Introduction

The following interim Management's Discussion & Analysis ("Interim MD&A") of Manitou Gold Inc. ("Manitou" or the "Company") for the three months ended March 31, 2022 has been prepared to provide material updates to the business operations, liquidity and capital resources of the Company since its last annual management's discussion & analysis, being the Management's Discussion & Analysis ("Annual MD&A") for the fiscal year ended December 31, 2021. This Interim MD&A does not provide a general update to the Annual MD&A, or reflect any non-material events since the date of the Annual MD&A.

This Interim MD&A has been prepared in compliance with section 2.2.1 of Form 51-102F1, in accordance with National Instrument 51-102 – Continuous Disclosure Obligations. This discussion should be read in conjunction with the Annual MD&A, audited annual consolidated financial statements of the Company for the years ended December 31, 2021 and December 31, 2020, together with the notes thereto, and unaudited condensed consolidated interim financial statements of the Company for the three months ended March 31, 2022, together with the notes thereto. Results are reported in Canadian dollars, unless otherwise noted. The Company's unaudited condensed consolidated interim financial statements and the financial information contained in this Interim MD&A are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board and interpretations of the IFRS Interpretations Committee. The unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, information contained herein is presented as of May 27, 2022, unless otherwise indicated.

For the purposes of preparing this Interim MD&A, management, in conjunction with the Board of Directors (the "Board"), considers the materiality of information. Information is considered material if: (i) such information results in, or would reasonably be expected to result in, a significant change in the market price or value of Manitou common shares; (ii) there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision; or (iii) it would significantly alter the total mix of information available to investors. Management, in conjunction with the Board, evaluates materiality with reference to all relevant circumstances, including potential market sensitivity.

Further information about the Company and its operations can be obtained from the offices of the Company, its website at www.manitougold.com or from www.sedar.com.

Technical Disclosure

The technical disclosure in this Interim MD&A has been prepared under the supervision of Mr. Richard Murphy, P. Geo. and a "qualified person" within the meaning of National Instrument 43-101. Mr. Richard Murphy is the Chief Executive Officer ("CEO"), President, and a Director of the Company.

Description of Business

The principal business of the Company is the acquisition, exploration and development of mineral property interests located in the Goudreau-Lochalsh area of Northern Ontario and in the Gold Rock District of Northwestern Ontario. To date, the Company has not earned any revenue from operations.

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

The principal mineral assets of the Company at the date of this Interim MD&A consist of a 100% interest in the Goudreau area properties, located northeast of Wawa, Ontario (the "Goudreau Project"), subject to certain royalties and other encumbrances.

The Company is a reporting issuer in British Columbia, Alberta, Saskatchewan, Manitoba and Ontario and trades on the TSX Venture Exchange under the symbol "MTU".

Operational Highlights

On March 4, 2022, the Company entered into a binding agreement (the "Agreement") to sell a 100% interest in its Kenwest, Gaffney, Canamerica, and Sherridon Properties (collectively, the "Dryden Property") to Dryden Gold Corp. ("Dryden Gold"). Under the terms of the Agreement, the consideration includes:

- Cash payment of \$1,000,000 on the effective date and the issuance of 4,000,000 Dryden Gold shares (the "Initial Payment") (cash payment of \$100,000 was received during the three months ended March 31, 2022 and the remainder was received in April 2022, along with the Dryden Gold shares);
- \$2,000,000 payable as 50% cash and 50% in Dryden Gold shares on the first anniversary of the effective date;
- \$2,000,000 payable as 50% cash and 50% in Dryden Gold shares on the second anniversary of the effective date; and
- \$2,000,000 payable as 50% cash and 50% in Dryden Gold shares on the third anniversary of the effective date.

Except the Initial Payment, all share issuances are contingent on Dryden Gold completing an initial public offering ("IPO") and shall be priced at the volume weighted average price of the shares on the principal stock exchange upon which they trade for the 20 trading days immediately preceding the respective option payment dates. If an IPO has not been completed by the respective option payment date, such option payment shall be payable entirely in cash.

Dryden Gold must also complete minimum exploration work on the Dryden Property totaling \$1,400,000 over a 3 year period, of which Dryden Gold has made a firm commitment to complete \$600,000 prior to the first anniversary of the effective date.

Upon payment in full of all cash payments, issuances of all shares, and completion of all work commitments, Dryden Gold will vest a 100% interest in the Dryden Property, subject to a 1% NSR to be retained by the Company (one half of which may be purchased, aside from the Kenwest Property, for a cash payment of \$1,000,000).

The Agreement was completed on April 22, 2022.

Mineral Exploration Property

The Company's exploration activities are at an early stage, and it has not yet been determined whether its properties contain an economic mineral reserve. There are no known deposits of

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

minerals on any of the Company's mineral exploration properties and any activities of the Company thereon will constitute exploratory searches for minerals. See "Risk Factors" below.

Goudreau Project

The Goudreau Project is located approximately 50 kilometres northeast of the town of Wawa, Ontario and covers a significant, highly prospective land package totaling approximately 350 square kilometres in the northeastern portion of the Michipicoten greenstone belt. The majority of the property was acquired through a combination of eight purchase and option agreements between 2017 and 2020. All option agreements have been fully exercised resulting in 100% ownership of the tenure related to such option agreements. In addition to the eight purchase and option agreements, the Company also acquired several mineral claims by staking, which are 100% owned by the Company.

The Goudreau Project is traversed by several deformation corridors, which host the majority of the important gold deposits and mineral occurrences in the region. The Cradle-Lake and Goudreau-Localsh deformation zones pass through the eastern project area and extend for 15 kilometers and 6 kilometres, respectively on Manitou's property. Two subparallel regional deformation corridors, the Baltimore and Easy Lake deformation zones extend through the eastern project area, with strike lengths of 18 kilometres and 26 kilometres, respectively on Manitou owned lands.

During 2021, the Company completed a comprehensive exploration program consisting of ground geophysics, geochemistry and geological surveys designed to generate priority drill targets along the Baltimore and the subparallel Easy Lake deformation zones. The former of which represents the eastern fault-offset extension of the Goudreau-Localsh deformation zone which hosts Alamos Gold's Island Gold mine and Argonaut Gold's Magino deposit.

Work completed during 2021 consisted of approximately 350 line-kilometres of induced polarization ('IP') surveying, approximately 23,000 soil samples and 1,900 line-kilometres of ground magnetic surveying and 59 diamond drill holes totaling 15,446 metres of diamond drilling. Ground magnetic surveying over portions of the Easy Lake deformation zone hosting the recently discovered Bald Eagle gold zone is largely completed and the resultant data is currently being analysed and interpreted in order to help define new targets for drill testing.

Technical work during 2021 delineated a nearly two kilometre long orogenic gold system at the Stover zone, located along the southeastern segment of the Baltimore deformation zone with highlight intersections in hole MTU-21-10 grading 1.8 g/t over 9.9 m, including 4 g/t Au over 4.0 m within a wider interval of 49.0 m of 0.7 g/t Au. Reconnaissance drilling at the Bald Eagle gold zone located along the eastern margin of the Easy Lake deformation zone yielded significant intersections in the stratigraphic footwall of a zinc-rich sulfide lens referred to as the Zinc zone. The most significant intersections are from holes MTU-21-39 which returned 22.8 m at 0.9 g/t Au, including 9 meters at 1.4 g/t Au; MTU-21-56 which intersected the same zone approximately 50 m down-plunge of hole MTU-21-39 and returned 90.5 m at 0.3 g/t Au, including 3.0 g/t over 0.9 m; and hole MTU-21-59, which tested the zone encountered above 250 m down-plunge of MTU-21-39 and intersected three broad zones of gold mineralization, between 299 m and 419 m down hole,

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

with the best intersection returning 3.4 g/t Au over 2.5 m within a wider interval of 27.9 m at 0.6 g/t Au.

Potential quantity and grade is conceptual in nature. There has been insufficient exploration to define a Mineral Resource on the Gourdeau Project to date and it is uncertain if future exploration will result in such project being delineated as a Mineral Resource.

In Q1 2022 the Company began to systematically test priority targets defined along a 10 kilometre strike length of the western portion of the 18 kilometre long Baltimore deformation zone. The winter drilling program is completed with 4,100 meters having been drilled in 16 holes. Final results of this program are expected in Q2 2022.

Current and Future Plans Related to the Goudreau Project

The following table summarizes the Company's current plans at the Goudreau Project, the total estimated costs, and total expenditures incurred to date.

Summary of Completed Activities (Three Months Ended March 31, 2022)	(A) Spent ⁽¹⁾ (rounded)	Plans for the Project	(B) Planned Expenditures (rounded)
Geological, geophysical and geochemical surveys identified numerous drill targets	\$918,000	Drilling of high priority gold targets	\$10,000,000
Total			\$10,918,000

⁽¹⁾ Total cumulative exploration activities incurred on the Goudreau Project to March 31, 2022 amounted to \$13,169,623 (December 31, 2021 - \$12,251,657).

Qualifying Expenditures Relating to Flow-Through Shares

In connection with the flow-through share financings completed in 2021, the Company has committed to incur qualifying Canadian Exploration Expenditures (as such term is defined in the Income Tax Act (Canada)) totaling \$6,129,500 by December 31, 2022. The Company has indemnified the subscribers of these financings as well as any past flow-through share subscribers for any tax and other costs payable by them in the event that the Company does not incur the required flow through expenditures.

As at March 31, 2022, the Company has incurred approximately \$5,695,500 of the required qualifying exploration expenditures.

Overall Objective

The Company is a junior mineral exploration company with an experienced management team engaged in the acquisition, exploration and development of properties for the mining of precious metals. Manitou is in the process of exploring its mineral properties and has not yet determined

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

whether these properties contain any economically recoverable mineral reserves. The success of the Company is dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain the necessary financing to complete exploration and development of its properties, the selling prices of minerals at the time, if ever, that the Company commences production from its properties, government policies and regulations and future profitable production, or proceeds from the disposition of such properties.

The Company may acquire additional mineral resource properties or companies holding such properties. The Company notes that mineral exploration in general is uncertain and the probability of finding economically recoverable mineral reserves on any one of its early stage prospects is low. However, the Company believes it is able to reduce overall exploration risk by acquiring additional mineral properties, thereby increasing its probability of finding economically recoverable mineral reserves. In conducting its search for additional mineral properties, the Company may consider acquiring properties that it considers prospective based on criteria such as the exploration history of the properties, their location, or a combination of these and other factors. Risk factors to be considered in connection with the Company's search for and acquisition of additional mineral properties include the significant expenses required to locate and establish economically recoverable mineral reserves, the potential that expenditures made by the Company may not result in discoveries of economically recoverable mineral reserves, environmental risks, risks associated with land title, the competition faced by the Company and the potential lack of adequate funding for any such acquisitions. See "Risk Factors" below.

Trends

Management regularly monitors economic conditions and estimates their impact on the Company's operations and incorporates these estimates in both short-term operating and longer-term strategic decisions. Apart from these and the risk factors noted under the heading "Risk Factors", management is not aware of any other trends, commitments, events or uncertainties that would have a material effect on the Company's business, financial condition or results of operations.

Environmental Liabilities

The Company is not aware of any environmental liabilities or obligations associated with its mineral property interests. The Company is conducting its operations in a manner that is consistent with governing environmental legislation.

Off-Balance-Sheet Arrangements

As of the date of this Interim MD&A, the Company does not have any off-balance-sheet arrangements that have, or are reasonably likely to have, a current or future effect on the financial performance or financial condition of the Company, including, and without limitation, such considerations as liquidity and capital resources.

Proposed Transactions

There are no proposed transactions of a material nature being considered by the Company. The Company continues to evaluate properties and corporate entities that it may acquire in the future.

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

Discussion of Operations

Financial Performance

Three months ended March 31, 2022 compared with three months ended March 31, 2021

Manitou's loss and comprehensive loss totaled \$859,696 for the three months ended March 31, 2022, with basic and diluted loss per share of \$0.00. This compares with a loss and comprehensive loss of \$1,478,012, with basic and diluted loss per share of \$0.01 for the three months ended March 31, 2021. The decrease of \$618,316 was principally due to the following factors:

- Exploration and evaluation expenditures decreased to \$826,935 for the three months ended March 31, 2022 (2021 - \$1,247,219) due to decreased exploration activities on the Goudreau Project.
- Option-based payments decreased to \$nil for the three months ended March 31, 2022 (2021 - \$413,300) as no stock options were granted during the current period compared to 10,700,000 stock options granted in 2021.
- Flow-through premium income decreased to \$195,468 for the three months ended March 31, 2022 (2021 - \$315,647). Flow-through premium income is related to the reduction of the flow-through share liability based on qualifying exploration expenditures incurred during the period.
- All other expenses related to general working capital.

Liquidity and Capital Resources

As at March 31, 2022, the Company had total assets of \$1,809,121, total liabilities of \$496,117 and a net equity position of \$1,313,004. This compares with total assets of \$2,655,822, total liabilities of \$483,122 and a net equity position of \$2,172,700 as at December 31, 2021.

The activities of the Company, principally the acquisition and exploration of properties prospective for precious metals, are financed through the completion of equity transactions such as equity offerings and the exercise of stock options and warrants. There is no assurance that future equity capital will be available to the Company in the amounts or at the times desired by the Company or on terms that are acceptable to it, if at all. See "Risk Factors" below.

The Company has no operating revenues and therefore must utilize its current cash reserves, funds obtained from the issuance of share capital, exercise of warrants and stock options and other financing transactions to maintain its capacity to meet ongoing operating activities. As of March 31, 2022, the Company had 344,567,782 common shares issued and outstanding, 27,450,000 options and 79,424,906 warrants outstanding that would raise \$9,408,731 if exercised in full. This is not anticipated in the immediate future. See "Trends" above.

Total liabilities increased to \$496,117 at March 31, 2022, compared to \$483,122 at December 31, 2021, and consist of amounts that are to be extinguished in due course. As of March 31, 2022, the Company's cash is sufficient to pay these liabilities.

At March 31, 2022, the Company had working capital of \$1,324,233, compared to \$2,204,839 at December 31, 2021, a decrease of \$880,606. The Company had cash of \$1,393,358 at March 31,

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

2022, compared to \$2,239,736 at December 31, 2021, a decrease of \$846,378. The decrease in working capital and cash can be attributed to the Company's exploration program and operating expenses.

Cash used in operating activities was \$822,267 for the three months ended March 31, 2022. Cash used in operating activities include net loss of \$859,696 for the period, adjusted by depreciation of \$3,201, flow-through premium income of \$195,468 and a net change in non-cash working capital balances of \$229,696 due to an increase in amounts payable and other liabilities of \$208,463 and a decrease of amounts receivable and other assets of \$21,233.

Cash used in investing activities was \$24,111 for the three months ended March 31, 2022. Cash used in investing activities included purchase of equipment.

The Company did not have any cash provided by or used in financing activities during the three months ended March 31, 2022.

The Company believes that additional financing will be required to fund its current and future plans for the Goudreau Project as outlined above.

The Company estimates its administrative overhead for fiscal 2022 to be approximately \$600,000. In order to meet the Company's current and future plans for the Goudreau Project, as well as meet its administrative overhead, for the near term, the Company will be required to complete a financing. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or under terms favourable to the Company. See "Risk Factors" below and "Caution Regarding Forward-Looking Statements" above.

The Company's discretionary activities do have considerable scope for flexibility in terms of the amount and timing of expenditure, and expenditures may be adjusted accordingly.

Transactions with Related Parties

Related parties include the Board, close family members and enterprises that are controlled by these individuals as well as certain persons performing similar functions.

The noted transactions below are in the normal course of business and are measured at the exchange amount, as agreed to by the parties, and approved by the Board in strict adherence to conflict of interest laws and regulations.

During the three months ended March 31, 2022, the Company paid professional fees and disbursements of \$20,923 (2021 - \$20,206) to Marrelli Support Services Inc., DSA Corporate Services Inc., DSA Filing Services Limited, and Marrelli Press Release Services Ltd., together known as the "Marrelli Group", for:

- (i) Carmelo Marrelli, President of the Marrelli Group, to act as the Chief Financial Officer ("CFO") of the Company;
- (ii) Bookkeeping services;
- (iii) Regulatory filing services; and
- (iv) Corporate secretarial services.

These services were incurred in the normal course of operations for general accounting and financial reporting matters. As at March 31, 2022, the Marrelli Group was owed \$1,131 (December 31, 2021 - \$2,192).

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

Key management personnel are comprised of the Chief Executive Officer ("CEO"), the President and the CFO. Salaries paid to key management personnel for the three months ended March 31, 2022 totaled \$59,960 (2021 - \$57,051). Directors' fees incurred for the three months ended March 31, 2022 totaled \$25,000 (2021 - \$nil). Option-based payments to key management personnel and the Board of Directors of the Company for the three months ended March 31, 2022 were valued using the Black-Scholes valuation model to be \$nil (2021 - \$251,070). As at March 31, 2022, the Board of Directors were owed \$25,000 (December 31, 2021 - \$nil).

	Three Months Ended March 31, 2022 (\$)	Three Months Ended March 31, 2021 (\$)
Salaries	59,960	57,051
Directors' fees	25,000	Nil
Option-based payments ⁽¹⁾	Nil	251,070
	84,960	308,121

⁽¹⁾ The dollar values in respect of the options were arrived at using the Black-Scholes valuation model.

As at March 31, 2022, Alamos Gold Inc. ("Alamos") controls 65,211,077 common shares, or approximately 19% of the total common shares outstanding of the Company. Alamos also holds 4,520,000 warrants to acquire an additional 4,520,000 common shares of the Company at an exercise price of \$0.09 per share. No other person or corporation beneficially owns or exercises control or direction over common shares of the Company carrying more than 10% of the voting rights attached to all the common shares of the Company.

Disclosure of Internal Controls

Management has established processes to provide them with sufficient knowledge to support representations that they have exercised reasonable diligence to ensure that (i) the condensed consolidated interim financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the condensed consolidated interim financial statements; and (ii) the condensed consolidated interim financial statements fairly present in all material respects the financial condition, financial performance and cash flows of the Company, as of the date of and for the periods presented.

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109"), the Venture Issuer Basic Certificate filed by the Company does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers filing such certificate are not making any representations relating to the establishment and maintenance of:

- (i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and

- (ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of condensed consolidated interim financial statements for external purposes in accordance with the issuer's generally accepted accounting principles (IFRS).

The Company's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in such certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Outlook

Although there can be no assurance that additional funding will be available to the Company, management is of the opinion if the gold price is favourable, it may be possible to obtain additional funding for its projects. Notwithstanding, the Company is mindful that the gold price could fall with little or no warning.

Accordingly, in order to execute the Company's plans for the near term as outlined under the heading "Mineral Exploration Properties" and meet the Company's administrative overhead, it is required to complete a financing. See "Risk Factors".

As of the date of this Interim MD&A, the Company is well positioned to continue its exploration along the Baltimore Deformation Zone ("BDZ"). As such, diamond drilling of targets along a structurally favourable section of the western portion of the BDZ is pending.

Caution Regarding Forward-Looking Statements

This Interim MD&A contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to herein as "forward-looking statements"). These statements relate to future events or the Company's future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "continues", "forecasts", "projects", "predicts", "intends", "anticipates" or "believes", or variations of, or the negatives of, such words and phrases, or state that certain actions, events or results "may", "could", "would", "should", "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The forward-looking statements in this Interim MD&A speak only as of the date of this Interim MD&A or as of the date specified in such statement. The following table outlines certain significant forward-looking statements contained in this Interim MD&A and provides the material assumptions used to develop such forward-looking statements and material risk factors that could cause actual results to differ materially from the forward-looking statements.

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

Forward-looking statements	Assumptions	Risk factors
The Company will be able to continue its business activities and exploration of its property interests as currently planned.	The Company has anticipated all material costs and risks, and such costs and activities will be consistent with the Company's current expectations; the Company will be able to obtain equity funding when required.	Unforeseen costs to the Company will arise; ongoing uncertainties relating to the COVID-19 virus; any particular operating cost increase or decrease from the date of the estimation; availability of permitting; any title issues relating to Aboriginal or other claims; environmental risk; and capital markets not being favourable for funding resulting in the Company not being able to obtain financing when required or on acceptable terms.
The Company will be able to carry out anticipated business plans and exploration activities.	The operating activities of the Company for the twelve months ending March 31, 2023 will be consistent with the Company's current expectations.	Sufficient funds not being available; increases in costs; ongoing uncertainties relating to the COVID-19 virus; the Company may be unable to retain key personnel.
Administrative overhead for 2022 is estimated to be approximately \$600,000	The Company has anticipated all material costs and risks, and such costs and activities will be consistent with the Company's current expectations	Unforeseen costs to the Company will arise; ongoing uncertainties relating to the COVID-19 virus; any particular operating cost increase or decrease from the date of the estimation

Inherent in forward-looking statements are risks, uncertainties and other factors beyond the Company's ability to predict or control. Please also make reference to those risk factors referenced in the "Risk Factors" section below. Readers are cautioned that the above chart does not contain an exhaustive list of the factors or assumptions that may affect the forward-looking statements, and that the assumptions underlying such statements may prove to be incorrect. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this Interim MD&A.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance or achievements to be materially different from any of its future results, performance or achievements expressed or implied by forward-looking statements. All forward-looking statements herein are qualified by this cautionary statement. Accordingly, readers should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. If the Company does update one or more forward-looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.

Risk Factors

An investment in the securities of the Company is highly speculative and involves numerous and significant risks. Such investment should be undertaken only by investors whose financial resources are sufficient to enable them to assume these risks and who have no need for immediate liquidity in their investment. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Company and its

Manitou Gold Inc.

Interim Management's Discussion & Analysis – Quarterly Highlights

For the Three Months Ended March 31, 2022

Dated: May 27, 2022

financial position. Please refer to the section entitled "Risk Factors" in the Company's Annual MD&A for the fiscal year ended December 31, 2021, available on SEDAR at www.sedar.com.

COVID-19 Risks

Due to the worldwide COVID-19 outbreak, material uncertainties may come into existence that could influence management's going concern assumption. Management cannot accurately predict the future impact COVID-19 may have on:

- Global gold prices;
- Demand for gold and the ability to explore for gold;
- The severity and the length of potential measures taken by governments to manage the spread of the virus, and their effect on labour availability and supply lines;
- Availability of essential supplies, such as water and electricity;
- Purchasing power of the Canadian dollar; or
- Ability to obtain funding.

The Canadian government has not introduced measures which impede the activities of Manitou. Management believes the business will continue and accordingly, the current situation bears no impact on management's going concern assumption. However, it is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of Manitou in future periods. The impact on the financial results and condition of Manitou in future periods.

Additional Information

Additional information regarding the Company is available on SEDAR at www.sedar.com.
